

WORK EXPERIENCE

- Functional and OOP in JavaScript ES6+
- Static Typing with Typescript
- Back-End Development (Nodejs, Express)
- Front-End Development (React, Native, Angular)
- Designing Web Architectures (Docker, Redis, DBs)
- Graphic Design and Animation (PS, IL, Figma, AE)

WORK EXPERIENCE DEMONSTRATED

[ORBIT SPORTS DATA](#)

Oct 2021 – Present

A German-based B2B startup providing real-time data via JSON API feed directly from athletic venues to fulfill the rising demands in the sport analytics industry.

Full-Stack Web Developer (Remote)

Handling all technical aspects of the product which includes:

Conceptualization and implementation of new features, Handling architectural decisions, Cross business integrations, Responsive front-ends and product deployment.

- **Functional and OOP in JavaScript ES6+:** Engineering JavaScript based backends using Nodejs and frontend applications using React and Angular, Utilizing TypeScript to ensure static type safety and the availability of latest ES features.

- **Back-End Development:** Building and maintaining new features and API integrations using Nodejs, implementing best practices for API security, Authorization and Authentication, fault tolerance, logging and error handling, ensuring code modularity using design patterns, Server deployment and management, ensuring low latency and high availability, adding automatic testing, Building adapters for B2B integrations.

- **Front-End Development:** Developing a customer match statistics application with Angular framework and Reporting applications for different sports using React library and Redux, Utilizing UI libraries to add visual style and interactivity, UI testing with Jest and Cypress, Responsive cross platform development.

[FREELANCE DEVELOPER AND DESIGNER](#)

Mar 2019 – Oct 2021

Worked on providing full-stack web development, web design and graphic design services for prospective clients, handled complete projects from design to deployment.

• Front-End Development:

- Built a React showcase website for [PetrossonBygg](#) a Swedish company that specializes in providing home installation services
- An online Gallery for [Le Pont Organization ME](#) which showcases the work of international artists

• Back-End Development:

- Developed a full-stack manual [image moderation system](#) that uses AI for pre-filtering,
- A [Full-stack application](#) that allows custom communication with Trello's REST-API
- A [Real-time chat application](#)

EDUCATION

B.S.E in Computer Engineering (Expected 2023). Aleppo University (Aleppo, Syria)

Projects: Connect 4 electronic game.

SKILLS AND TECHNOLOGIES

Front-End: JavaScript/TypeScript, HTML5/CSS3, React/Redux/React Native/styled-components, Bootstrap/Material, Firebase, Angular.

Back-End: JavaScript/TypeScript, Node, Express, ESLint, REST APIs/Socket.IO, Git/GitHub, NoSQL/SQL, Redis, TypeORM, Docker, Jest, Puppeteer, Design Patterns, PM2, NGINX, EJS, Plesk, Docker, Linux, AWS.

Graphic Design: Photoshop, Illustrator, Figma, Premiere, After Effects, Maya.

Languages: English (Bilingual Proficiency), Arabic (Native)
